Powder Technology 100 (1998) 281–283

POWDER TECHNOLOGY

Subject Index of Volume 100

Agglomerating fluidization
prediction of agglomerate sizes in bubbling fluidized beds of group C powders, 223
Agglomeration
simulations of vibrated fine powders, 211
Anisotropy shape
effect of particle shape on the particle size distribution measured with commercial equipment, 52
Attrition
attrition of porous glass particles in a fluidised bed, 242
Averaging in multiphase flow
a numerical validation of continuum time averaging, 119

Breakage behavior
breakage behavior of quartz in a laboratory stirred ball mill, 69
Bubble columns
coherent structures in multiphase flows, 123
Bunkering phenomenon
confirmation of Faraday's explanation of bunkering in vibrated granular beds, 200

Calibration procedure
a novel calibration procedure for a fiber optic solids concentration probe, 260
Capacitance tomography
dynamics of gas-particle flow in circulating fluidized beds, 173
Ceramic filter
changes in pressure loss and face velocity of ceramic candle filters caused by reverse cleaning in hot coal gas filtration, 32
Circulating fluidized bed
dynamics of gas-particle flow in circulating fluidized beds, 173
profiles of particle velocity and solids fraction in a high-density riser, 183
Coal gasification
changes in pressure loss and face velocity of ceramic candle filters caused by reverse cleaning in hot coal gas filtration, 32
Coarse solids
minimum fluidization velocities for gas–liquid–solid three-phase systems, 113
Coherent motions
coherent structures in multiphase flows, 123
Cohesive particles
prediction of agglomerate sizes in bubbling fluidized beds of group C powders, 223
Computational fluid dynamics
scale effects in fluidized multiphase reactors, 137
Concentration probe
a novel calibration procedure for a fiber optic solids concentration probe, 260
Core shell composite particles
physical and chemical interactions in multi-component composite particles prepared by mechanical stressing, 46

Deagglomeration
experimental analysis of sample preparation conditions for particle size measurement, 61
Defocus
particle sizing using Particle Imaging Velocimetry for two-phase flows, 251
Diffraction
particle sizing using Particle Imaging Velocimetry for two-phase flows, 251
Dispersion
a new sizing technique for fine powders dispersed in air, 15
Distributor
separation of a binary particle mixture in a vibrating fluidized bed of dense medium, 41
Downer
transient dynamics of solid concentration in downer fluidized bed, 166
Dynamic simulation
simulations of vibrated fine powders, 211

Faraday circulation
confirmation of Faraday's explanation of bunkering in vibrated granular beds, 200
Fast fluidization
transient dynamics of solid concentration in downer fluidized bed, 166
Fast fluidized bed
multi-component granulation in a fast fluidized bed, 237
FCC particles
dynamics of gas-particle flow in circulating fluidized beds, 173
Fiber optic
a novel calibration procedure for a fiber optic solids concentration probe, 260
Filtration
changes in pressure loss and face velocity of ceramic candle filters caused by reverse cleaning in hot coal gas filtration, 32
Fine ceramic powder
effect of particle shape on the particle size distribution measured with commercial equipment, 52
Flow structures
coherent structures in multiphase flows, 123
Fluidised beds
attrition of porous glass particles in a fluidised bed, 242
Fluidization velocities
minimum fluidization velocities for gas–liquid–solid three-phase systems, 113
Fluidized bed
separation of a binary particle mixture in a vibrating fluidized bed of dense medium, 41
comparison of jetting phenomena in 30-cm and 3-m diameter semi-circular fluidized beds, 147
Fluidized beds
coherent structures in multiphase flows, 123

Gas–liquid–solid
minimum fluidization velocities for gas–liquid–solid three-phase systems, 113
Gas–solid fluidized bed
scale effects in fluidized multiphase reactors, 137
Gas interchange
comparison of jetting phenomena in 30-cm and 3-m diameter semi-circular fluidized beds, 147
Gas jets
attrition of porous glass particles in a fluidised bed, 242
Granulation
multi-component granulation in a fast fluidized bed, 237

High density
profiles of particle velocity and solids fraction in a high-density riser, 183
High pressure
single bubble formation in high pressure liquid–solid suspensions, 103

Instability
dynamics of gas-particle flow in circulating fluidized beds, 173
Intensity weighting
particle sizing using Particle Imaging Velocimetry for two-phase flows, 251

Jet mixing system
particle paths in three-dimensional flow fields as a means of study: opposing jet mixing system, 161
Jets
comparison of jetting phenomena in 30-cm and 3-m diameter semi-circular fluidized beds, 147

Kinetic model
suitability of the kinetic model for estimation of powder reaction rate, 24
breakage behavior of quartz in a laboratory stirred ball mill, 69

Laser
particle sizing using Particle Imaging Velocimetry for two-phase flows, 251
Liquid–solid suspension
single bubble formation in high pressure liquid–solid suspensions, 103

Mechanochemistry
physical and chemical interactions in multi-component composite particles prepared by mechanical stressing, 46
$MgTiO_3$
physical and chemical interactions in multi-component composite particles prepared by mechanical stressing, 46
Minimum fluidization velocity and distributor
a parametric study of a horizontal rotating fluidized bed using slotted and sintered metal cylindrical gas distributors, 190
Mixed sample
experimental analysis of sample preparation conditions for particle size measurement, 61
Monte Carlo simulation of gas-particle suspension
a numerical validation of continuum time averaging, 119
Multi-component
multi-component granulation in a fast fluidized bed, 237

Non-oxide
experimental analysis of sample preparation conditions for particle size measurement, 61

Particle aggregates
a new sizing technique for fine powders dispersed in air, 15
Particle morphology
acetate-derived ZnO ultrafine particles synthesized by spray pyrolysis, 20
Particle paths
particle paths in three-dimensional flow fields as a means of study: opposing jet mixing system, 161
Particle pressure
prediction of agglomerate sizes in bubbling fluidized beds of group C powders, 223
Particle science
the history and recent activities of the Society of Powder Technology, Japan, 7
Particle shape
effect of particle shape on the particle size distribution measured with commercial equipment, 52
Particle-size analyzer
effect of particle shape on the particle size distribution measured with commercial equipment, 52
Particle size distribution
suitability of the kinetic model for estimation of powder reaction rate, 24
Particle size measurement
a new sizing technique for fine powders dispersed in air, 15
effect of particle shape on the particle size distribution measured with commercial equipment, 52
experimental analysis of sample preparation conditions for particle size measurement, 61
Particle velocity
profiles of particle velocity and solids fraction in a high-density riser, 183
Phase locking
coherent structures in multiphase flows, 123
PIV
particle sizing using Particle Imaging Velocimetry for two-phase flows, 251
Porous glass particles
attrition of porous glass particles in a fluidised bed, 242
Positron emission particle tracking (PEPT)
attrition of porous glass particles in a fluidised bed, 242
Powder reaction rate
suitability of the kinetic model for estimation of powder reaction rate, 24
Powders
simulations of vibrated fine powders, 211
Powder synthesis
acetate-derived ZnO ultrafine particles synthesized by spray pyrolysis, 20
Powder technology
the history and recent activities of the Society of Powder Technology, Japan, 7
Pressure drop
a parametric study of a horizontal rotating fluidized bed using slotted and sintered metal cylindrical gas distributors, 190
Pressure loss
changes in pressure loss and face velocity of ceramic candle filters caused by reverse cleaning in hot coal gas filtration, 32
Primary particle
a new sizing technique for fine powders dispersed in air, 15
Pulse jet
changes in pressure loss and face velocity of ceramic candle filters caused by reverse cleaning in hot coal gas filtration, 32

Quartz grinding
breakage behavior of quartz in a laboratory stirred ball mill, 69

Random nucleation
acetate-derived ZnO ultrafine particles synthesized by spray pyrolysis, 20
Rotating fluidized bed
a parametric study of a horizontal rotating fluidized bed using slotted and sintered metal cylindrical gas distributors, 190
Round robin
effect of particle shape on the particle size distribution measured with commercial equipment, 52

Sample preparation conditions
experimental analysis of sample preparation conditions for particle size measurement, 61
Scale up
scale effects in fluidized multiphase reactors, 137
Separation
separation of a binary particle mixture in a vibrating fluidized bed of dense medium, 41
Single bubble formation
single bubble formation in high pressure liquid–solid suspensions, 103
Size prediction
prediction of agglomerate sizes in bubbling fluidized beds of group C powders, 223
Sizing
particle sizing using Particle Imaging Velocimetry for two-phase flows, 251
Slurry reactors
scale effects in fluidized multiphase reactors, 137
Society of Powder Technology
the history and recent activities of the Society of Powder Technology, Japan, 7
Solid concentration
transient dynamics of solid concentration in downer fluidized bed, 166
Solids fraction
profiles of particle velocity and solids fraction in a high-density riser, 183
Spray pyrolysis
acetate-derived ZnO ultrafine particles synthesized by spray pyrolysis, 20
Standpipe flow
dynamics of gas-particle flow in circulating fluidized beds, 173
Stirred ball mill
breakage behavior of quartz in a laboratory stirred ball mill, 69

Thermal decomposition
acetate-derived ZnO ultrafine particles synthesized by spray pyrolysis, 20
Three-dimensional flow fields
particle paths in three-dimensional flow fields as a means of study: opposing jet mixing system, 161
Two-phase model
scale effects in fluidized multiphase reactors, 137

van der Waals force
prediction of agglomerate sizes in bubbling fluidized beds of group C powders, 223
Vibrated beds
simulations of vibrated fine powders, 211
Vibrated granular bed
confirmation of Faraday's explanation of bunkering in vibrated granular beds, 200
Vorticity
coherent structures in multiphase flows, 123

Zinc oxide
acetate-derived ZnO ultrafine particles synthesized by spray pyrolysis, 20
